## PROFESSIONAL EXPERIENCE

### Hearthfire Holdings (Private Equity Real Estate) — Senior Business Intelligence Architect

*Wilmington, DE • 03/2025 – 12/2025*

- Designed and built secure web-based analytics portal with backend database infrastructure, delivering dynamic dashboards with interactive charts and real-time portfolio visualization for institutional investors
- Developed AI-integrated document management platform featuring automated document summarization, intelligent search capabilities, and dynamic lending statistics visualizations
- Transformed enterprise underwriting model from Excel to full-stack web application, maintaining complex financial logic while enhancing user experience through intuitive interface design and automated workflows
- Engineered capital stack financing tools enabling multi-tier investment analysis, automated waterfall calculations, and scenario modeling across preferred equity, common equity, and debt structures
- Developed Python-based data transformation pipelines to extract, process, and summarize complex datasets from multiple PDF and Excel sources into actionable analytics
- Rebuilt existing Excel-based underwriting model to a more sophisticated, accurate, and user-friendly tool

### Top Hat CRE (Commercial Real Estate Development) — Director, Investment Analytics

*Wilmington, DE • 01/2022 – 12/2024*

- Engineered comprehensive real estate investment models in Excel for institutional-grade underwriting, resulting in successful evaluation of 100+ commercial assets across multifamily, self-storage, and mixed-use sectors
- Developed proprietary Python/HTML analytics platform for deal pipeline management, investment metrics tracking, and portfolio performance analysis
- Automated institutional investor reporting workflows through Python scripting, reducing report generation time by 90% while enhancing data accuracy
- Drove investment strategy through advanced financial modeling, sensitivity analysis, and risk assessment for institutional investors and board members
- Managed complex fund modeling including IRR calculations, waterfall distributions, and investment performance metrics for institutional-quality assets

### OneMain Financial (Banking/Lending) — Quantitative Analytics Lead

*Wilmington, DE • 01/2017 – 12/2021*

- Led quantitative analysis for $1B+ in portfolio acquisitions using statistical modeling and machine learning techniques
- Implemented automated credit risk models in Excel achieving 90% accuracy in delinquency forecasting
- Developed comprehensive profitability analysis framework incorporating risk-adjusted returns and portfolio optimization
- Created predictive analytics models via Excel/Python to evaluate credit risk factors and borrower behavior patterns
- Established enterprise-wide modeling standards for portfolio valuation and risk assessment

**Pro Capital, LLC (Private Equity) — Senior Quantitative/Modeling Analyst**

*Philadelphia, PA • 01/2015 – 01/2017*

- Sole source of financial modeling and analysis for a Private Equity Real Estate Investment firm managing six unique investment funds
- Created complex five-year pro forma financials and multi-variable sensitivity analysis for each fund, anticipating changes in borrowing base, asset acquisition, and asset redemption
- Engineered modeling breakthroughs to accurately forecast leverage based on targeted cash balance and automatically trigger fund sunset/redemption based on multiple variables
- Presented fund performance to board members and investors on an ongoing basis; produced all presentation materials for the CEO
- Created ad-hoc financial models and statistical analyses for lending banks, board members, and investors

**Ashland, Inc. (Chemicals) - FINANCIAL ANALYST, OIL & GAS TECHNOLOGIES**

*Wilmington, DE • 06/2012 - 12/2014*

- Managed financial planning and analysis for $500M+ revenue business unit, including budgeting and forecasting
- Developed working capital optimization models using advanced Excel and SAP integration
- Conducted investment analysis for capital projects using NPV, IRR, and sensitivity analysis
- Performed market analysis and financial feasibility studies for new product development

**DuPont Corporation (Chemicals) - Financial Analyst, Research and Development**

*Des Moines, IA • 01/2011 - 01/2012*

- Evaluated group's annual $700 million USD budget by conducting in-depth financial analysis and communication with Directors; concluded that many areas of budget were at risk and worked with Directors to identify areas for potential cost savings, resulting in 2011 budget within target.
- Created and maintained forecast models on departmental, business segment, and consolidated basis by working with functional department heads and senior management; forecasts showed potential risks, resulting in research teams taking appropriate actions such as spending reduction and project elimination resulting in cost savings of approximately $50 million USD.
- Performed due diligence on various acquisition targets and made recommendations based on in-depth analysis.
- Prepared ad hoc requests from external and internal management, conducted cost reviews with Research Directors, and oversaw collaborations and grant development with Buffet Foundation and Gates Foundation.

**DuPont Corporation - Tax Analyst**

*Wilmington, DE • 01/2010 - 01/2011*

- Supported global SALT group in preparation of annual and quarterly state tax returns

**DuPont Corporation - Cost Accountant**

*Wilmington, DE • 01/2007 - 01/2010*

- Supported cost accounting functions and FP&A functions for company's largest North American manufacturing site.

## CONSULTING HIGHLIGHTS

- **Source Renewables, LLC:** Developed renewable energy (solar) portfolio valuation models, assisted with valuation of firm's securitization of commercial office space
- **Glasspoint, Inc.:** Rebuilt capex forecasting and manufacturing models including the acquisition of manufacturing and office facilities (cost/benefit analysis)
- **Harvard Business School:** Created advanced financial modeling curriculum materials
- **VisualDx:** Implemented SaaS revenue forecasting and analytics platform
- **CDW:** Automated FP&A workflows and enhanced performance analytics
